SIMONDS®

PreSharp™

IS REAL SHARP!

PreSharp™ IS AVAILABLE IN 3 WIDTHS:

- 1" OS wide
- 1-1/4" wide
- 1-1/2" wide

Not all Ground Tooth blades are created equal!

PreSharp™
SQUARE FACE BLADE DETAIL

Simonds PreSharp™ blades have a unique, square-face cutting edge.

Conventional blades, even "ground tooth" types, have a twist on the face. This **twist** pushes saw dust to the sides of the blade, potentially causing poor tracking and dust spillage.

BANDSAW BLADES FOR ALL CUTTING APPLICATIONS

MAKE SIMONDS YOUR SOURCE FOR
PORTABLE SAWMILL BLADES, FIREWOOD PROCESSING SAWS, SAW TEETH, & CHIPPER KNIVES.

SAWBLADES AND TEETH FOR FIREWOOD PROCESSING SAWS

THE 2014 FOREST PRODUCTS EQUIPMENT

Buyer's GUIDE

Our goal is to provide you with a concise, convenient place to find the products and services you need to run your business most successfully. This Guide is organized into two major sections:

- 1) Company Profiles**, which detail manufacturers and their products and services.
- 2) Product Listings**, which include contact information and an alphabetical index by product category. A table of contents helps you easily locate the information you need.

We hope you'll keep your Buyer's Guide handy and reference it throughout the year. When you contact manufacturers listed here, let them know you saw their listing in *Sawmill & Woodlot*! And, for a free digital copy of the Buyer's Guide, go to www.sawmillmag.com.

If you wish to be included in the 2015 Buyer's Guide, please contact me directly at 888/290-9469, or e-mail walter@sawmillmag.com

Bailey's

CORPORATE DESCRIPTION

BAILEY'S HAS BEEN A LEADER in small-scale wood processing equipment for over 38 years. We are continually searching the world for new, cost-effective products to process standing trees into saleable goods. Our products cover the complete spectrum of forestry, from professional chain saws and safety equipment to portable sawmilling and moulding capabilities.

MAJOR PRODUCTS

Bailey's offers a wide spectrum of processing equipment:

- **Portable Chain Saw Mills.** Let Bailey's help you turn your chain saw into a sawmill. Milling lumber or beautiful slabs with a chain saw can be an extremely fun and rewarding hobby or business. Just about anyone can do it and Bailey's has solutions to fit almost any budget. The Logosol M8 portable chain saw mill is a high-production solution for producing lumber with a chain saw and yet is extremely affordable.
- **Logosol Planer/Moulders.** These 4-head moulders turn rough-sawn lumber into a finished product, often worth much more. These ingenious machines will surface all four sides of a board in one pass, and give you the option of several hundred different

knife designs to make just about any shape imaginable.

- **4K Dry Kiln.** The perfect dry kiln for portable sawmills. This kiln will dry up to 4,000 BF of green 4/4 hardwood in about five weeks, using only 450 kWh of energy. This kiln uses an efficient dehumidification process to dry difficult woods with ease.
- **Log Trailers and Grapples.** We offer several log-trailer and grapple systems so you can easily transport timber. These grapple systems range from off-road ATV sizes to 10-ton models for larger trucks.

SERVICES

Bailey's is a catalog and e-commerce company with an extensive array of products for the forest-products and tree-care industries. We're an authorized Husqvarna, Honda, and Echo dealer and carry hundreds of different styles of chain saw chains and bars as well as thousands of OEM and aftermarket chain saw replacement parts. Bailey's has built its reputation on a professional and knowledgeable staff, fair prices, and industry-leading time of delivery. Bailey's is extensively stocked with thousands of quality products and replacement parts. Bailey's website also features their industry-leading PartFINDER, which offers the ability to view manufacturer-illustrated parts lists

(IPLs) and easily order replacement parts online. Customers can also view online order history, package tracking, customer reviews, hundreds of online product demo videos, and an interactive frequently-asked-questions (FAQ) feature. Many of our major products, like the Logosol M8 chain saw mill, Logosol planer/moulder, and log trailers with grapples, have free comprehensive demonstration videos and brochures available. ●

Baker Products

CORPORATE DESCRIPTION

FOR OVER 25 YEARS, Baker Products has been the log-to-lumber leader in the design and manufacturing of thin-kerf resawing and sawmilling equipment. Their complete lines of scragg mills, edgers, portable sawmills, band resaws, cut-to-length equipment, and conveyers can be purchased separately or combined into a system that will efficiently disassemble raw material, wasting the least amount of wood possible. They are unsurpassed in the design of heavy-duty, low-labor, high-production, efficient log breakdown equipment.

MARKETS SERVED

Baker Products not only offers sawmill equipment for everyone, ranging from weekend hobbyists to full-time industrial sawyers, but also stocks a full product line of planers and moulders. Safety, quality, productivity, and efficiency are but a few of the key characteristics of a successful business, and at Baker, every effort is made to make a single operator as productive as possible. Baker Products' equipment is simple, user-friendly, and easy to use.

MAJOR PRODUCTS

Baker offers several sawmill models:

- **The Baker BP Dominator™** stationary band sawmill was designed for industrial-strength, high-production sawmilling. A 50-hp electric motor comes standard to power your way through hardwood logs measuring up to 36 inches in diameter. Hydraulic controls are located on the operator control console, which is equipped with a chair for comfort. Two 36-inch-diameter, all-steel band wheels help to extend blade life, and a laser light, in-line debarker, and setworks come standard.
- **The Model 3665D Baker Blue Streak** portable band sawmill was built to handle big logs and big jobs. It can saw logs measuring up to 36 inches in diameter and 20 feet 6 inches. Longer models available upon request. The Model 3665D features 65-hp Cummins diesel engine and full hydraulic controls for log loading, turning, clamping, and leveling. Computer setworks and a debarker are also available. Optional power trains include 38-hp Kohler gasoline engine (Model 3638G).

- **The Model 3630E Baker Blue Streak** stationary band sawmill offers superb power capability with its 30-hp electric motor. It is built heavy-duty and comes standard with full hydraulic controls and utilizes a 1-1/2 inch band blade on two 28-inch-diameter band wheels. Power options include 40-hp electric motor (Model 3640E) or 50-hp electric motor (Model 3650E).

- **The Baker 18HD** portable band sawmill is named "HD" for "heavy-duty." This work-horse comes complete with trailer tow package, attached drop-down legs for quick leveling and easy setup. It utilizes a 20-hp Honda gasoline engine and can cut logs 30 inches in diameter and up to 20 feet long. Optional hydraulic upgrade now available.

- **The Model 18M Baker** portable band sawmill is a terrific mill powered by a 20-hp Honda gasoline engine and is capable of sawing logs up to 30 inches in diameter and 16 feet long.

- **The Baker Wood Buddy™** is an economical mill with a 9-hp Honda gasoline engine that can turn logs as big as 28 inches in diameter into excellent lumber, ties, and squares ready for market. The Wood Buddy is a no-frills manually operated mill with a really fine, straight cut.

- **The Baker Heavy-Duty Portable Board Edger** is the perfect companion to the larger, higher-production mills. Choices of power include gasoline, diesel, or electric. The heavy-duty edger is fast and efficient at removing the waney edges and comes standard with a tow trailer package so you can take it just about anywhere. Stationary electric models are also available.

In addition, Baker offers the independent sawmiller accessories such as band blade sharpeners, setters, Lenox® WoodMaster™ band saw blades, steel hoppers, slab racks, dead rollers, powered chain, belt, and roller-style conveyers, log infeed deck, cant hooks, stacking racks, planers, and much more. Baker also offers a full line of economical woodworking equipment, including single- and double-sided surface planers, 4-sided planer/moulders, and a 6-spindle, 4-sided moulder. ●

CORPORATE DESCRIPTION

BROWNWOOD SALES is a family-owned and -operated business. Our initial interest in the wood industry has now evolved to include forest machinery sales with special emphasis on the small-scale, independent operator. We provide expert advice on not only procuring wood, but also skidding it with a Tajfun winch, hauling it on an Anderson log loader trailer, sawing it on a Hud-Son sawmill, splitting and processing with Timberwolf equipment and wrapping it on a Twister. We supply these quality brands at the best possible prices and back them up with friendly and knowledgeable support. Our strengths are wood

industry knowledge, machinery know-how, available inventory, and expert customer service and support. ●

Shown at left: A number of inventory items staged for the Paul Bunyan Show: Timberwolf splitters, Hud-Son bandsaw mills, Anderson knucklebooms, Tajfun winches, Timberwolf processors, Twister firewood wrappers, and a PieceMaker. Plus we sell at factory prices or lower!

CRD Metalworks LLC

CORPORATE DESCRIPTION

AS A FAMILY-OWNED and -operated company, relationships are crucial to our success. That's why CRD Metalworks LLC, the manufacturer of the Woodbine line of firewood processors, is dedicated to offering the best price-to-value equipment on the market.

We develop and fabricate some of the most profitable-to-own and easy-to-maintain firewood processors in the world. We offer direct-from-the-factory service and sales, with no middlemen or dealers to haggle with. In addition, we sell parts and offer warranty replacement direct from our plant.

MARKETS SERVED

We are a global company, shipping overseas as well as into Canada. The majority of our customers come from the logging and tree services markets, but we also have a strong farm and arborist following. Represented in our price points, which are the most reasonable in the business, is a commitment to helping businesses grow and succeed in the firewood retail or wholesale markets.

MAJOR PRODUCTS

We offer a comprehensive line of chain saw-driven and circular blade models to fit any budget or capacity/throughput requirement. All built on a DOT-certified trailer platform, our machines can be paired with a wide array of power plants, splitting options, and conveyer configurations to suit the individual customer. Specializing in "all-in-one" machines with full portability, each Woodbine comes ready to work and is fully featured. In addition, we are 100% transparent in our pricing, because we serve our customers factory direct.

• **The Woodbine Pro Lineup.** We offer three sizes of chain saw processor, capable of processing 16-inch, 20-inch, and 24-inch maximum diameters. Built super tough for durability, these machines are built to perform.

All Woodbine Pro models feature super-fast 4-second splitter cycle times, 24-foot conveyers, and a DOT trailer base for maximum portability.

We use quality Oregon Harvester cutting products for maximum performance and durability.

All Woodbine Pro models feature adjustable wedges and other features that make them some of the fastest and most productive models on the market today.

• **The Woodbine Rapido Loco Lineup.** It's not a secret: The Rapido Loco lineup of processors is the best machine for the best price available, hands down.

With a blazing-fast, sub-4 second block-to-block cycle time, our circular blade processors are a complete game changer for any firewood producer.

Available models are capable of processing 16-inch, 20-inch, and 24-inch maximum diameters. In addition to all the standard features of the Woodbine Pro lineup, they are equipped with Danfoss variable-displacement hydraulics and Simonds International saws, the gold standard for quality and reliability. Among the most popular machines on the market today, our Rapido Loco lineup is battle tested and stands shoulder to shoulder with any comparable machine in the market.

• **The "Green Monster" Woodbine Splitter.** The "Green Monster" is a fully portable, single-operator machine that requires no support equipment to set up on the woodlot.

This is not your average wood splitter: with 38 hp it is able to handle up to 20-inch-diameter blocks and split them 8 ways in a single pass.

Built off the specs of our 20-inch capacity firewood processor, the "Green Monster" has a fully adjustable wedge, fully automatic splitting cycle, and can produce up to 2 cords of wood per hour in ideal conditions.

It features an integrated 15-foot conveyer, hydraulic log lift, and a 5-inch custom hydraulic ram with a super-fast 5-second cycle time...making this THE wood splitter to own if you are serious about firewood.

CRD Metalworks LLC wants to earn your business by helping you make the best decision possible. There are no gimmicks or bad-talking the competition—we want you to buy our machines for the right reasons: price and value. Our pricing is transparent, our service is old-fashioned, and we want you to be successful with any of our Woodbine firewood processors. See our videos and get more information online. ●

Emden, MO 63439

ph: 573/633-2135
fax: 573/633-2004

www.ezboardwalk.com

CORPORATE DESCRIPTION

EZ BOARDWALK specializes in heavy-duty manual band sawmills. We use off-the-shelf parts and have everything on hand as we are both the manufacturer and the direct marketer. We offer mills for custom sawyers, farmers, weekend operators, specialty sawyers, etc.

- Our EZ Boardwalk Model 40 is available with a 24-hp Honda engine or a 25-hp

Subaru. It can be set up as a stationary mill or used as a portable mill. The mill operates easily with its angle cut feature that creates a pulling effect—a big advantage on these heavy-duty manual mills. The lift system is a hand crank with a torsion spring for ease of operation. Sawing capacity is 40 inches by 16-1/2 feet with track extensions available. A manual log turner and siding and shingle attachment are available.

- The EZ Boardwalk Junior is a heavy-duty mill powered by a 13-hp Honda engine or 14-hp Subaru. Sawing capacity is 30 inches by 12 feet 2 inches with 5- or 10-foot track extensions available. This model can also be used as a portable or a ground model.

We offer a semiautomatic band sharpener that takes about four minutes to sharpen a band, and we also stock log arches, tongs, cant hooks, etc. ●

LEWIS WINCH

1-877-906-7711

www.youtube.com/lewiswinch

"I love my new Lewis Winch. I've been using it to line up the logs for my Woodmizer LT 15 Sawmill. The Winch and Mill are a perfect

combination for turning wood into lumber and cants. What a team! But I can't wait to take it out playing, because I got my Lewis Winch not just for work, but also to play. The Winch is such a great product. I really enjoy yanking logs around with it. I should have gotten one years ago."

— Byron Gagne, Whitehorse, Yukon Territory

J.S. Woodhouse Co.

CORPORATE DESCRIPTION

J.S. WOODHOUSE CO., established in 1843, is an implement distributor offering a variety of tractor and skid steer attachments. Corporate headquarters is in West Springfield, Massachusetts, and there are three branch warehouse locations (Lewisberry, Pennsylvania, Syracuse, New York, and Fairfield, Maine). Woodhouse offers farming, forestry, landscape, and light industrial equipment and the suppliers chosen by Woodhouse are high-quality, reliable manufacturers. The staff of Woodhouse has a wide range of knowledge to share when recommending low-impact forestry equipment along with the equipment for other markets served.

MAJOR PRODUCTS

Woodhouse offers Frangard 3-point timber winches to fit tractors 25 hp–110 hp, Kesla log loaders and log trailers from 8 to 15-ton capacity, Hakki Pilki firewood processors, with models capable of handling 12-inch to 20-inch logs, and Split-Fire wood splitters, available 3-point hitch mounted and with self-contained engine models. A large dealer network is available throughout the Northeast to handle sales, service, and warranty of its equipment. Within the wide range of equipment, there are models for both the part-time producer and the professional. ●

ph: 910/259-1624
fax: 910/259-1625

e-mail: sales@kiln-direct.com

www.kiln-direct.com

CORPORATE DESCRIPTION

KILN-DIRECT, located near Wilmington, North Carolina, produces approximately 80 kilns annually. The company is the largest provider of both pallet and firewood kilns in the United States and offers a line of small to midsized units with all of the functionality and capabilities of large industrial kilns. In 2009, Kiln-direct launched a new high-temperature kiln for drying and heat-treating firewood with either gas- or wood waste-fired systems.

Kiln-direct was founded in 1994 by Niels Jorgensen; however, its roots date back three decades to Wooddryer System, started by Niels's father, Valde Jorgensen. In

2001, the two companies were merged at the North Carolina location to allow for continued focus on both current and future domestic and international customers.

The new Quick series firewood kilns come in two sizes: MiniQuick (6 Cords) and SmallQuick (12 Cords). The Quick firewood kilns are designed to dry firewood in two days or less.

Like the Quick series firewood kiln, Kiln-direct's lumber kilns are delivered in completed units. Starting at 9,000 BF volume, Kiln-direct's lumber kilns range up to 21,000 BF (based upon 4/4 tally and 3/4 stickers). The midsize lumber kilns are available in two models—ranging from 20,000 BF to 40,000 BF. All Lumber Kilns are constructed using aluminum for structure (interior and exterior) and include a full-featured computerized control system with optional integrated moisture meter. ●

CORD KING COMPACT FIREWOOD PROCESSOR

COMPACT SPECIFICATIONS

Trailer: Tandem axle, 8'6" wide, 22'-30' long, 11'8" high, 5-7 tons, Electric brakes.

Left Coast Supplies

CORPORATE DESCRIPTION

LEF T COAST SUPPLIES LLC is a new company with a lot of experience. Specializing in what we call “urban forestry,” our five partners have extensive experience in chain saw cutting technology, tree/pole climbing equipment, and sawmilling (log breakdown, lumber grading, marketing slabs).

MAJOR PRODUCTS

We are the North American dealer for Lucas mills and parts. We carry 10 versions of the Lucas mill—two of which are dedicated slabbers—as well as a full line of Oregon products. Our company also supplies chain saw bars, chain saw chain, chain saw sprockets, and chain saw chain maintenance equipment to a wide range of people, from the backyard firewood cutter to the professional timber harvester. Left Coast Supplies recently developed a working relationship with GB Australia, a major manufacturer of quality forestry bars and sprockets, and this association will permit us to offer a high-quality alternative to our

Oregon line of bars and sprockets. We are proud to offer a full line of climbing supplies from Spyder U.S.A. Spyder is a U.S. manufacturer of top-quality climbing products, offering a huge list of American-made products, from saddles and climbing spurs to rope grabs and pulleys.

SERVICES

Our goal is to offer great deals and superb product knowledge to our customers. We deal exclusively in Lucas mills and offer expert advice on all aspects of the machine—milling lumber, slabbing logs, planing and sanding slabs, and making lap siding. We offer expert troubleshooting for Lucas mill customers and chain saw operators as well as comprehensive tree/pole climbing equipment advice. ●

CORPORATE DESCRIPTION

Located in the beautiful foothills of the Cascades, Linn Lumber has been building quality sawmills for 22 years. Family owned and operated, we provide exceptional customer service and products. We specialize in heavy duty sawmills that are easy to operate and maintain.

You can chose from one of our complete sawmills, or we can help you build your own with one of our easy-to-use kits.

Our **Model 1900** can handle a 36-inch-diameter log and has a 30-inch throat. It comes standard with an 18-hp Vanguard engine or a 10-hp electric motor, hydraulic blade tensioner, blade lube system, and 20 feet of track which allows for 16-foot cuts.

The **Model 190-A** comes with the same options as the 1900 and can handle a 30-inch log with a 26-inch throat. It comes standard with a 13-hp Honda engine or 7.5-hp electric motor.

Logosol Inc.

CORPORATE DESCRIPTION

LOGOSOL is a worldwide leader in small-scale wood processing equipment. The company was a pioneer in using chain saws as a powerhead for milling, which paved the way for thousands of individuals worldwide to mill their own lumber. Logosol products are found in over 50 countries. Logosol has also brought simplicity and efficient designs to the planer/moulder industry, and provided a pricing breakthrough in 4-head planer/moulders with their two different models. These planers are designed to provide maximum milling capacity for the most economical price. The Logosol PH260 was the first small 4-head planer available in the U.S. The company focuses on simple, solution-driven designs that provide long service with minimum expense. Their attention to machines that provide value-added capability has resulted in many existing sawmill owners moving into new markets. Recently Logosol has joined forces with Bailey's to provide the best in U.S. distribution and customer service. All Logosol products may now be ordered online through the Logosol store at www.baileysonline.com.

MARKETS SERVED

Logosol is currently focused on two markets: the weekend miller, and the professional sawmiller who is looking to add value to his products. Logosol has focused on bringing education and solid, safe products to the new sawmillers by providing information along with precision woodworking machinery and proven milling techniques to get new sawmillers up to speed as quickly as possible. With the new PH360 machine, Logosol brings its unique approach to equipment design to the professional sawmiller. This machinery provides a reasonably priced way for sawmillers to enter new markets with minimum risk exposure. Logosol also provides a way for these new value-added customers to grow as they continually add new knife patterns to their unique insert-tooling catalog.

MAJOR PRODUCTS

- **Sawmills.** Logosol offers a wide range of portable sawmills and slabbing solutions to fit every budget. With the Logosol Portable M8 Sawmill you can quickly produce high-quality

lumber from your logs, in the length and dimensions of your choice. You'll be able to get started quickly and find that the M8 sawmill is very easy to use. By the first day you will already have produced a good-sized stack of lumber. Visible scales and sawing in fixed steps make setting quick and accurate. Whether you are sawing boards for paneling or squared logs for building log homes, the accuracy of the M8 is impressive. Built of strong, anodized aluminium, the M8 is strong and rigid, yet so lightweight that one person can lift and move it by hand. Truly portable, you can take it just about anywhere.

- **The Sauno VT5 Wood Kiln.** Swedish drying technology enables small-scale woodworkers to have a cost-effective way to dry wood and achieve better results in a shorter period of time. The Sauno kiln dries lumber with the help of steam and high temperatures. It releases tensions and produces straight lumber without cracks. The wood comes out suitable for planing within a week. You can build the kiln box of insulated material. This is a scalable kiln, as several drying units can be installed to provide larger kiln capacities.

- **The Timberjig** turns your chain saw into a portable sawmill. This lightweight, unique mill is made to be cost-effective, easy, and fun to use. You attach the Timberjig to the same two bolts on your chain saw that hold the chain bar. The Big Mill System provides major components to build your own homemade sawmill.

- **Planers/Moulders.** The PH260 is a standard in the industry, bringing insert-tooling and 4-head operation to a new generation of sawmillers. This planer/moulder is easy to set up, rugged in design, and simple to operate. The newest addition to Logosol's planer/moulder lineup, the PH360 has the capability to mould all four sides up to 14 inches by 5 inches. Released in the fall of 2010, this moulder is outselling all previous Logosol planers in the U.S. ●

CORPORATE DESCRIPTION

MENOMINEE SAW and Supply Company Inc. offers a full line of equipment and supplies—from the wood yard to the lumberyard—to a worldwide customer base of sawmill operators. For more than 100 years we have helped our valued customers transition from bucksaws to select band and circular saws, filing room tools, and general sawmill supplies. The key to our long-term success has been quality and service. Your grandfather depended on us to keep his mill operation “up to snuff” and so can you.

Menominee Saw provides troubleshooting and alignment services, band wheel grinding, filer training (both in-house and on-site), filing room layouts, stellite tipping (both circle and band), knife grinding, wide bands 3-inch to 16-inch (new and repair service), carbide tipping, and circular saw

hammering, tensioning, and complete rebuilding.

In terms of sales, Menominee Saw has complete filing rooms/tools/supplies, band mills, carriages and resaws, knife grinders, lubrication systems, wide bands 3-inch to 16-inch, band saw guides and guide grinders, narrow bands (wood and metal), a complete line of carbide tooling, cutter-heads, knives (veneer, chipper, counter, planer), inserted tooth circular saws, bits, shanks, grinding wheels for any application, and custom tooling designed for your application needs.

Menominee Saw has been a leader in thin-kerf technology, servicing the upper Midwest since 1893, representing Armstrong, Simonds, West Plains Resaw, Radiac and Pacific Grinding Wheels, in addition to manufacturing our own bands and circular carbide-tipped saws. ●

Mobile Manufacturing Co.

CORPORATE DESCRIPTION

MOBILE MANUFACTURING Company, located in Troutdale, Oregon (near Portland), manufactures the Mobile Dimension Saw for people who want a sawmill for occasional use or a full-time business.

The Mobile Dimension Saw is a unique one-man sawmill that will cut any size log and lengths up to 40-foot hardwoods or softwoods. You can move the entire sawmill to the logs on a trailer or set it up on a framework and move the logs to the sawmill. The saw cuts extremely accurate lumber with high production, low operating

expenses, easy operation, and maximum log recovery. Three saw blades cut the board accurately in one pass and return the lumber to the operator for easy handling. Sawmills are available in gasoline- or electric-powered models. ●

multiteknorthamerica

CORPORATE DESCRIPTION

MULTITEK North America LLC is the worldwide leader in firewood processing equipment. Multitek specializes in firewood processing equipment that meets the rigorous demands of its customers and withstands the test of time. With an emphasis on innovation, Multitek has brought many of the leading features in firewood production to market. This includes the patented overhead shuttle grapple, the patented packaging wedge system, the wood tumbler, and the most recent development—a patented guillotine-style circular saw option for its latest machine (1620 SS). Multitek products are sold throughout North America, South America, Europe, Australia, South Africa, and Asia.

- **The 1620 SS** is a very fast and economical small-diameter machine. With a patent-pending 40-inch, guillotine circular saw cutting method, the machine produces 2-plus cords of firewood with logs up to 16

inches in diameter. The machine boasts a powerful 44-hp turbo diesel engine and consumes a little more than one gallon of diesel per operating hour. This machine is the fastest, lowest-maintenance small-diameter machine on the market today. This machine is well suited for the growing firewood business.

- **The 2025ldcs** firewood processor features the patented Multitek exclusive overhead shuttle grapple for feeding in the lowest-grade crooked logs. The overhead shuttle grapple serves as the machine's log infeed system, and eliminates the clamp function found on other machines. The 2025ldcs is very well suited for the high-volume producer and features a low-maintenance 48-inch, carbide circular saw, or a bar and chain cutting system.

- **The 3040XP2** firewood processor is the most rugged-built largest firewood processor available. This machine features a 115-hp, turbo-charged diesel engine and weighs in at nearly 20,000 pounds. This machine is designed to take logs as small as 3 inches in diameter to logs as large as 34 inches in diameter, and turn out a high-quality finished firewood product. For the everyday firewood professional, look no further than the Multitek XP2 series firewood processors. ●

Norwood Portable Sawmills

CORPORATE DESCRIPTION

NORWOOD HAS BEEN designing and building premium-quality portable sawmills for over 20 years. More than 25,000 Norwood sawmills are hard at work in over 100 countries, processing millions of dollars of valuable lumber.

- **Global Leader in Portable Sawmill Innovation:** With over 50 patents, more than all the sawmill companies around the world put together, Norwood is the proven global leader in portable sawmills innovation.

- **Productive:** Norwood continues to invest heavily in R&D with the goal of advancing the frontiers of portable sawmill innovation. Norwood focuses its research on technology that cuts the time it takes to mill a log into lumber. By eliminating operator functions, speeding up cycle times, and increasing capacity, Norwood sawmills are dramatically more productive and profitable than any other.

- **Quality-Built:** Every Norwood is quality-built and rugged enough to mill lumber day-in-and-day-out with the absolute minimum of maintenance. The mills are easy to use, easy to look after, and dependable.

- **Sawmills take a beating**—they have to handle heavy logs and accurately cut lumber in tough conditions. Imports from China or Poland may not be up to the task. When the chips are down, you want a sawmill that can stand up to the challenge. Norwood mills are quality-built for the long haul.

- **Affordable:** Even with all the innovation, patents, and superior quality,

Norwood sawmills are affordable. In fact, compared feature-for-feature, and factoring in construction and finish quality, Norwood sawmills are a better value than any other sawmill on the market.

- **Versatile:** Unique to Norwood is the concept of “customizability.” This gives Norwood band mills unparalleled versatility. You can customize your mill with added capacity and a variety of manual, hydraulic, and power functions.

Often first-time sawmill owners have never sawn lumber before, or they begin with a limited budget. Start affordably with one of Norwood’s productive, easy-to-use band mills, and then, as your sawmilling operation grows, grow your sawmill to match, increasing functionality and throughput along the way. For example, get started milling 36-inch-diameter logs right away with the large-capacity LumberPro HD36, manually configured. Then, build up your LumberPro HD36 into a fully-hydraulic, fully-powered portable sawmill at any time as your milling operation grows.

Dollar for dollar, no other portable sawmill is more productive, reliable, easy to use, or versatile than a Norwood Sawmill. It’s the brand name most trusted by sawyers around the world. ●

Nyle Systems

CORPORATE DESCRIPTION

NYLE BUILDS lumber dryers for every application.

We specialize in dehumidification units for good reasons—they are efficient both from a cost-to-purchase and a cost-to-own basis, they do a really great job drying wood, they are easy to run, and they last. We build indirect gas-fired kilns that take advantage of today's low natural gas prices. We also build kiln chambers or provide made-to-order packages for those who choose to build their own. We build kiln doors and fan trusses. We fit kilns for steam or hot water or hot oil. We perform highly custom services to suit our customers' needs, but our specialty is dehumidification drying and we try very hard to be the best at it.

Nyle has a shop full of engineers and refrigeration experts. Their talents allow us to supply kiln systems for every size business that uses lumber, from small operations drying only a few hundred feet at a time to the largest manufacturers drying 300,000 BF or more. Nyle's systems dry lumber with fewer air emissions and less energy consumption, making Nyle truly low cost to operate and environmentally friendly. Nyle recognized early on the growing importance of the small sawmill market and for many years has assisted many in that new and growing industry in achieving success. Nyle also offers pallet and crate-wood sterilization systems and firewood dryers that are used throughout North America.

MAJOR PRODUCTS

- Nyle L53 is a truly up-to-date small kiln for hobbyists, replacing an earlier model for 25% less cost! The L53 will dry up to 300 BF of pine or 1,000 BF of oak, but despite its small size, the unit is built to last with the same quality features found in bigger kilns.
- Nyle L200 is a smaller package for those interested in drying 1,200–5,000 BF at a time. This low temperature system is about as close as it gets to a perfect machine, being simple, reliable, and cost effective. The maximum temperature during the drying process is 120°F, but the system can run as high as 160°F after drying to set pitch or sterilize lumber. The L200 produces top quality lumber, with minimum capital investment, minimum operating costs, and greatest simplicity. This system is used in

1,000–4,000 BF kilns.

- Nyle L300, L500, L1200, and HT Systems are larger systems that operate to 160°F and dry most species as fast as conventional commercial kilns while providing quality and reliability. Used in kilns ranging from 5,000 BF to 300,000 BF, they offer all the features available on the largest of the Nyle systems.
- Nyle VHT is the newest development in the dry kiln industry. They dry at temperatures as high as 220°F. These systems are designed for very large installations drying softwoods. For example, one system dries 150,000 BF of spruce every 40 hours. These are large capacity systems for drying softwoods at high volume.
- Nyle Gas-Fired Kilns take advantage of low cost energy and save the cost of purchase and maintenance of a boiler.
- Nyle Firewood Dryers use heat from your hot water boiler to rapidly and inexpensively dry firewood. Nyle provides coils and fans, controls and plans to build a chamber on-site and through computerized controls, to provide documentation which is required in more and more jurisdictions.
- Nyle Heat Treating builds on decades of Nyle kiln-drying experience by providing computer-controlled systems for heat-treating crating lumber, export lumber and pallets. Nyle systems are fast, reliable, and the most durable and safest in the industry.
- Nyle Chambers. We do it all, not just dehumidifiers and doors, but the entire chamber as well. Using aluminum and insulation, we accurately build your kiln so it can be easily shipped and quickly erected on-site. Strong, light, and tight.
- Controls, Parts, Supplies include replacement parts or new items to improve performance. Fans, wet bulb sockets, moisture meters, and special kiln wheels are just a few.

SERVICES

Nyle works hard to keep you as a customer and we back up all our products—both new and used—with outstanding service and support widely recognized as the best in the business. We operate on the assumption that customers will grow and need another kiln. This has proven a successful formula as almost half of our business is sales to customers that have Nyle equipment. Isn't it time you joined those successful operators and built a Nyle kiln of your own? ●

OESCO Inc.

CORPORATE DESCRIPTION

OESCO INC., a highly diversified agricultural equipment company, carries a wide variety of woodlot management tools as well as forestry and logging equipment made in America and Europe.

Established in 1954 as Orchard Equipment and Supply Company, the business has grown and shifted with the multitude of changes that have occurred within the agricultural industry. What is especially unique about this company is the personal contact throughout the purchasing process. Collectively, the employees delve into each new area to learn all they can so they can be better informed about the products.

MAJOR PRODUCTS

OESCO is the American importer of Tajfun's 3-point-hitch logging winches (7,900–22,500 pound capacity models) and fast, efficient firewood processors with log loader and conveyer. Tajfun, located in Slovenia, is the largest producer of logging

winches in Europe and has been manufacturing since 1967. OESCO is the American importer for the Italian-made Goldoni Transcar, a very popular trilateral dump utility vehicle. OESCO also carries additional forestry brands such as Iron and Oak, Wallenstein, JMS Trailers, LogRite Tools, and Peavey, as well as full lines of agricultural sprayers, mowers, fittings, hand tools, orchard supplies, and much more.

SERVICES

With many tenured employees, OESCO will help you with your forestry choices, with the backup of a full service department, including a very active machine and welding shop for custom fabrication and repair. OESCO is located only minutes from I-91, exit 24N or 25S, Route 116 in Conway, Massachusetts. ●

The Ohio Forestry Association & The Paul Bunyan Show

CORPORATE DESCRIPTION

THE PAUL BUNYAN SHOWSM (PBS) is an annual trade show serving the commercial logging, sawmilling, and wood processing industries. The PBS is produced and managed by the Ohio Forestry Association (OFA), a non-profit trade association dedicated to strengthening and expanding the wood products industry for the benefit of Ohio companies, employees, customers, landowners, and the general public. The main focus of the PBS, which has been conducted every year since 1957, is to promote an intensive sales forum featuring hundreds of exhibits and equipment demonstrations representing the newest logging, sawmilling, and wood processing products and equipment available. The PBS brings buyers and sellers together in a unique business-to-business environment. It is an outstanding opportunity for equipment displays and demonstrations, where technical experts are available to answer questions from professionals in the industry. It also offers a chance for buyers to compare prices and purchase the latest equipment and technology.

MARKETS SERVED

The PBS exhibitors and OFA members are the manufacturers and suppliers of the equipment, tools, and technologies that are setting the pace in timber harvesting and processing. Exhibitors include the manufacturers and suppliers of a wide variety of

wood industry equipment including harvesters, forwarders, log loaders, skidders, portable sawmills, delimiters, chippers, firewood splitters and processors, conveyers, dry kilns, chain saws, lumber-grading and -marking gear, moisture meters, safety equipment, tires, ATVs and other off-road equipment, and specialty trailers. The PBS attendees are equipment buyers representing a broad base of industry segments. Attendees include sawyers, loggers, timber transporters, firewood processors, arborists, forest-product producers, forest management professionals, association management, government forestry professionals, and the general public.

SERVICES

The PBS is primarily an outside exhibition but includes inside exhibit spaces. Live demonstrations of equipment are a key part of the show, with many exhibitors demonstrating their equipment capabilities using wood provided through the show. While geared heavily toward trade interests, the PBS also conducts a variety of mixed consumer/trade activities including separate Ohio and International Lumberjack competitions, log loader competitions, a skid steer rodeo, lumberjack entertainment, amateur contests and competitions and chain saw maintenance and safety clinics. The PBS is also the host for The Great Portable Sawmill Shoot-Out[®] and The Great Firewood Shoot-Out[™], produced by *Sawmill & Woodlot* magazine. These two events alternate each year and The Great Firewood Shoot-Out[™] will be conducted in 2014.

In addition, the PBS offers a variety of wood industry trade and general interest forestry classes and seminars for attendees. Included in this is the acclaimed seminar program produced by *Sawmill & Woodlot* magazine.

If you are interested in exhibiting or attending PBS or becoming a member of OFA, please visit the OFA website, www.ohioforest.org. ●

Simonds International

COMPANY
PROFILE

CORPORATE DESCRIPTION

SIMONDS INTERNATIONAL is the most successful, innovative, and oldest manufacturer of both industrial cutting tools and the equipment to maintain them in North America. We are proud to have successfully navigated our way through the recent serious market downturn—one of many in our 181-year history.

Most *Sawmill & Woodlot* readers know Simonds as the company that manufactures Red Streak® brand narrow-kerf band saw blades for portable sawmills, circular saw blades for firewood processing, and insert tooth bit and shank saws for lumber production. Simonds has been involved in the portable narrow-kerf band saw sawmill blade business since its beginnings in the 1980s and in commercial sawmills for nearly two centuries. Our success comes from providing our customers an edge, 'The Professionals' Edge™.

MARKETS SERVED

Approximately 50% of Simonds International's revenues are derived in one form or another from trees. In addition to sawmill and woodlot owners, Simonds' customers include large integrated sawmills, arborists and brush chippers, chip mills for pulp and paper, large OSB and plywood plants, and weekend woodworkers.

The balance of Simonds markets served include industrial users of metal-cutting band saw blades. Simonds manufactures carbon steel, carbide-tipped, and bimetal band saw blades from 1/8 inch wide up to 3-1/8 inch wide. Our saws are used for everything from general metal cutting, to processing production cutting of large billets of steel, to aerospace and automotive applications.

Simonds manufactures a full range of narrow-kerf band saw blades engineered for today's high-production portable sawmills, pallet-cut stock producers, and specialty wood producers.

Simonds' other sawmill products include sawmill chipper knives, custom-made wide band saw and large diameter circle saw blades, carbide tips, grinding wheels and hand tools, and filing room capital equipment and tools.

Today, Simonds International is a multi-million-dollar privately held company. The

company continues to maintain its world-wide corporate headquarters in Fitchburg, Massachusetts.

In addition to the factory in Fitchburg, Simonds International has factories or distribution centers in Michigan, Alabama, Oregon, Quebec, British Columbia, England, Germany, Honduras, and Brazil. The vast majority of our products are sold exclusively through authorized distributors.

MAJOR PRODUCTS

Simonds International's products for the forest products industry include Red Streak® narrow-kerf band saw blades, circular saws for firewood processing, brush chipper knives for use in portable chippers, sawmill chipper knives, chipper knives for pulp and paper mills, and custom-made wide band saw blades from 4 inches to 16 inches wide and up to 60 feet long.

Simonds International manufactures industrial woodworking knives for the manufacture of OSB and plywood, and industrial circular saws from 14 inches to 96 inches in diameter for cutting logs and boards to length as well as ripping them into boards. Other products include an extensive line of metal-cutting band saw blades and machinery for the maintenance of industrial saw blades under the Armstrong brand. At Simonds International, we pride ourselves on being, and providing, 'The Professionals' Edge™. ●

CORPORATE DESCRIPTION

TAJFUN—a well-established world-wide brand—is a family-owned and -operated company with over 45 years of experience in the forestry industry. Along with our reliable U.S distributor—OESCO Inc.—we have proudly served the American market for over 10 years.

MAJOR PRODUCTS

• **Logging Winches:** Tajfun's 3-point logging winches—with loading capacities from 7,900 to 22,500 pounds—are a necessity for every logger, forester, and farmer. Manual and hydraulic models enable the user to log

easily, efficiently, and most of all safely!

• **Firewood Processors:** RCA 400 JOY is truly a joy to operate and will tremendously increase your firewood productivity. This processor is an excellent choice when cutting logs with diameters up to 16 inches—and it offers various splitting options, a single joystick operating unit and a slewing conveyor. And be on the lookout for Tajfun's upcoming revolutionary firewood processor the RCA 600 JOY.

• **Tajfun's Bober electronic digital caliper** and its unique software support your work in the forest as well as in the office. ●

Thomas Bandsaw Mills

COMPANY PROFILE

CORPORATE DESCRIPTION

DALE A. THOMAS & Sons Inc. was started in 1982 as a family-owned and operated business. Today owned by Jonathan Thomas, it has been manufacturing rugged sawmills since 1997. Four different sawmill models and two different edger models are manufactured.

The Model 8020 is our largest sawmill with a 20-hp Honda motor. This model is packed with features along with a rugged 4-post design. The large 20-inch diameter band wheels allow for a 1-1/2-inch wide blade for extra stability. The blade is also at a lead angle so it allows for stability at the start of the cut. The standard track length cuts a 16-foot 6-inch log length with a diameter of 36 inches and a 32-inch distance between guides. With no head assembly required for shipping and costing only \$8,000, it's a lot of saw for the money. Key features include;

- Positive chain lift with scale
 - Lube tank on all unites included
 - Torque wrench provides for proper blade tension which allows for easy blade changes.
- Models 8020, 8013, 2411**
- Shields open for full access to the blade
 - Centrifugal clutch for easy use on all units
 - Eccentric log clamps with five bunks
 - We offer an Adirondack/clapboard siding attachment at an affordable price.

Our Model 8013 has the same features as the Model 8020 and a 13-hp Honda motor, starting at \$7,000. Model 6013 has a 13-hp Honda electric start. It saws a 16-foot, 6-inch log with a 30-inch diameter. Model 2411 has a 11-hp Honda manual start. It saws a 10-foot log with a 24-inch diameter and starts at \$4,250. Again no saw-head assembly required.

We stand behind our product as well. See our website for more. We can ship anywhere. ●

TimberKing Inc.

TimberKing, Inc.
1431 N. Topping Ave.
Kansas City, MO 64120
ph: 800/942-4406

www.timberking.com

www.facebook.com/timberkingsawmills

Portable mills have changed a lot since TimberKing started making them early in the last century.

Below: In late 2008 the 2000 mill replaced the B-20 in TimberKing's line, offering the similarly rugged construction but replacing many electrically run features with direct-action hydraulics.

CORPORATE DESCRIPTION

FOUNDED IN 1929 under the name "Belsaw," TimberKing is America's oldest manufacturer of portable sawmills. TimberKing's original product was the Belsaw circular mill, which was in constant production from 1929 until 1998. Tens of thousands of these mills were sold worldwide.

"It's such a great heritage," says TimberKing president Will Johnson. "Every week we get a call from someone who's still cutting with a mill his dad or granddad bought. I want my kids to get those calls, saying a 50-year-old TimberKing mill is still going strong."

TimberKing has long been one of the most innovative forces in the portable band mill market. This innovation, along with TimberKing's unmatched history and commitment to service, combine to offer an exclusive set of advantages avail-

able from no other company we know of.

We call it the TimberKing Advantage:

- 1) 4-post saw head
- 2) Solid welded twin beam cut deck
- 3) Wider and taller cut throats—width of cut from 29 inches to 36 inches; throat height from 16 inches to 24 inches
- 4) Direct action hydraulics—the simplest and most dependable system for running major mill functions
- 5) Strongest warranties—no questions asked 30-day money-back guarantee, 2-year limited mechanical warranty and five-year limited cutting deck warranty

"We want our customers to have the most innovative products available. Period," Johnson says. "But we also insist on having the kind of quality and service that has kept our family in this business for over 80 years." ●

Above: For many years the B-20 was TimberKing's flagship mill. Taken early last year, this picture shows that these B-20s are still going strong.

Timberwolf Manufacturing Corp.

CORPORATE DESCRIPTION

TIMBERWOLF is a family-owned company that for over 19 years has been the choice of pros around the world when it comes to commercial log splitters, firewood processors, and firewood conveyers. Our extensive line of firewood processing machines are hand welded at our factory in Vermont and powered with the highest-quality U.S.-sourced components. Our machines are sold only through qualified servicing dealers.

MAJOR PRODUCTS

Timberwolf Firewood Processors. Our PRO-HD XL is engineered to be rugged, dependable, and fast. This firewood processor can literally split wood as fast as you can cut it. Designed for maximum output, it has a blistering cycle time of 4.5 seconds. It comes standard with an 80-hp John Deere diesel engine, electric auto-cycle, hydraulic oil cooler, and comfortable operator's seat. Do the math and watch the profits stack up! A top choice of professionals, the PRO-HD XL offers a

high degree of customization with an industry-proven design. Rated at 4-1/2 cords per hour, the PRO-HD XL is a powerhouse firewood processor and the "flagship" of the Timberwolf processor line.

FEATURES

- Fast clamping, patented Top Roll system handles odd or crooked logs with ease
- Cut and split at the same time
- Super-fast hydraulic cutoff saw
- Live deck
- 80-hp John Deere engine
- 4.5 second cycle time
- DOT-approved electric brakes
- 2-5/16 hitch and safety lights
- Legendary Timberwolf quality, built to last in the USA
- 4-, 6- and 8-way wedges available
- Up to 22-inch-diameter wood.

www.youtube.com/woodmizersawmills

CORPORATE DESCRIPTION

TRUSTED BY more than 50,000 customers as a company that embodies old-fashioned values of integrity and American-made quality, Wood-Mizer works to improve and innovate their products and the support they offer around the world, supplying solutions from forest to final form.

MARKETS SERVED

Employee owned, customer focused, and family based, Wood-Mizer Products serves lumber processing customers from 20 North American locations and with nearly 100 international dealers and agents.

MAJOR PRODUCTS

- **Portable Sawmills** – Offering 12 sawmill models, Wood-Mizer provides everyone from the weekend hobbyist to the production-minded business owner the perfect match for their needs.

The portable Wood-Mizer mills are well-known for their unique head and bed design that Wood-Mizer customers love for its easy offbearing and easy setup.

- **Wood-Mizer Blades and Blade Maintenance** – Wood-Mizer continues to be on the cutting edge as a manufacturer of band blades and blade maintenance equipment with the release of a new line of blade sharpeners and setters, along with new blades for high production sawing and better performance with highly abrasive wood species. New products include a 3-inch blade which is an excellent and more economical replacement for 4-inch and wider bands. Another new addition is the carbide-tipped blade for cutting tropical and extremely hard wood species.

- **Wood Processing Equipment** – Wood-Mizer offers single- and twin-blade edgers, moulders, and a basic line of wood-drying kilns. Wood-Mizer also offers more mill attachments than any other sawmill manufacturer.

- **Wood-Mizer Industrial** provides a full line of narrow-band, thin-kerf sawing technology and related equipment to the commercial lumber industry. Wood-Mizer Industrial's product line includes computerized thin-kerf headrigs, single- and multi-head resaws, edgers, a small-log processing line, and unique material-handling machinery. ●

We Call It: Getting Your Money's Worth!

(We also hear that from Frangard winch owners at trade shows across the continent!)

With four models, that can fit tractors from 25 - 110 HP, with their ease of operation, and a well-established dealer network, it is no wonder, that their owners are content. Frangard's priority is that the customer is satisfied with the product, and each winch is carefully built with pride and a commitment to your being satisfied.

FRANGARD WINCHES ARE DESIGNED TO BE "LIGHT ON THE LAND"

AN 20-24 PLANER

Revive old boards into new or size new material to the exact thickness you need with the Model AN-20 or 24 Baker Automatic Planer. This machine uses a unique helical cutter head that lasts eight times longer than traditional straight cutters, significantly reducing maintenance and increasing production.

PLANERS

M-412 PLANER/MOULDER

The M-412 Planer/Moulder is a combination system with 4-sided planing & moulding. This machine's entire table can be raised and lowered via a digital input with keypad and digital display. It holds a planing capacity width of 13" and thickness of 7/16" - 9". The Baker M-412 is a heavy duty and compact combination machine that can fulfill both your planing and moulding needs.

& MOULDERS

AN-610 MOULDER

The AN-610 Moulder is an automatic double-surface planer that is designed for high-speed, one-pass planing of lumber. To minimizing maintenance cost the AN-610 is equipped with a centralized lubrication system and a long-lasting helical cutter head. The cutters are powered by a 15-hp motor on top and a 10-hp motor on the bottom.
